SKILLS & TOOLS

UX & Interface Design

Interaction Design · Information Architecture · Wireframing · Prototyping · Usability & Accessibility · Visual Hierarchy · Layout & Typography · Design Systems (*Figma · Miro · Adobe Illustrator · Adobe Photoshop*)

User Studies & Research

UX Research · Service Design · Journey Mapping · Persona Development · Systems Thinking · Research Synthesis · User Observation & Documentation

Information & Spatial Visualization

Information Design · Data Visualization · GIS & Spatial Analysis · Urban Visualization · Cartography · Context Mapping · Spatial Narratives (*QGIS, SketchUp*)

Technical & Fabrication Skills

3D Modeling · Photogrammetry · 3D Printing · Digital Documentation · Physical Model Making (*SketchUp · Photogrammetry Software · 3D Printing Tools*)

EDUCATION

Master of Design
Information Design
NID, Bangalore
2024 – 2026

Bachelor of Planning
SPA, Bhopal
2019-2023

HSLC
PCM - CS
JNV, Mahe
2011-2018

PROJECTS (ACADEMIC)

KFON Website Redesign — E-Governance Service Redesign

Design Project — Information Design Studio, SEM III

An ongoing redesign of the Kerala Fibre Optic Network's digital service platform aimed at enhancing citizen experience, accessibility, and operational transparency. The project involves reimagining the information architecture, mapping user and service journeys, developing a comprehensive service blueprint, and introducing new design interventions for improved service delivery.

Mapping the Invisible: Fading Cultural Narratives through Information Design

Design Project — Information Design Studio, SEM II

Designed a digital platform exploring the modernization of Kaavu - the sacred groves of Kannur - through spatial, iconographic, and cultural lenses. The project involved field documentation, secondary research, narrative structuring, and interface design, culminating in an interactive website that bridges heritage interpretation with modern user experience.

WORK EXPERIENCE

Intern (Research Assistant) | Jul 2023 - Oct, 2023

School of Planning and Architecture, Bhopal

- Facilitated digital documentation of Indian temples through photogrammetry, 3D visualization, and SketchUp modelling.
- Supported creation of scaled physical models via 3D printing and mould fabrication.
- Contributed to development of 1:16 clay temple model showcased at National Conference on Indian Temples and History.
- Designed posters and visual materials for conference presentations.
